Acrylic (Water-based) Paints

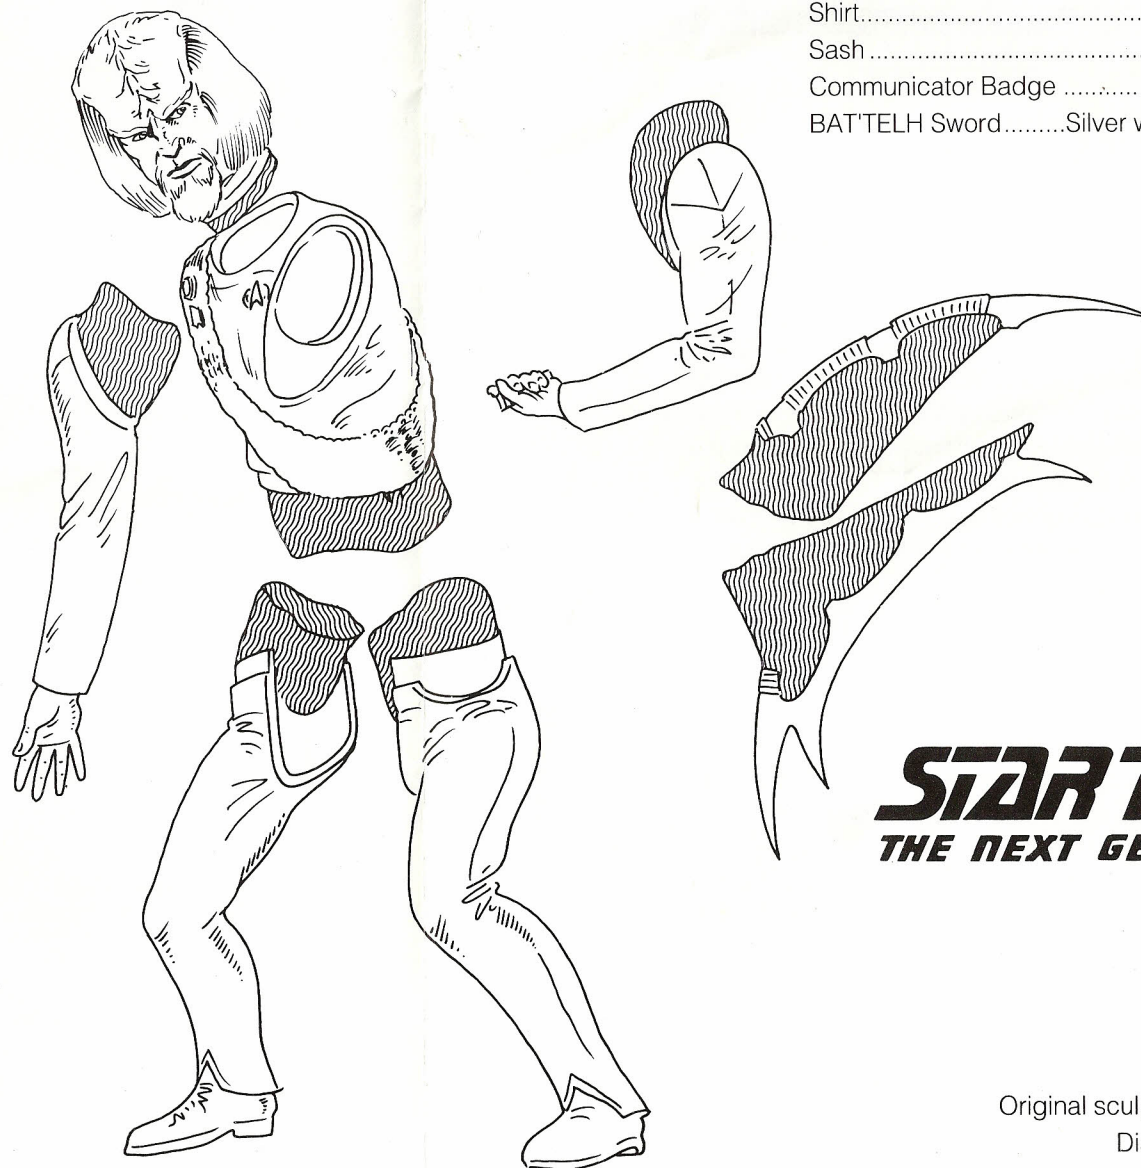

Directions

- **Adult supervision is recommended for modelers under the age of 14.**
- Wash parts with dish soap and water to remove mold release.
- Some parts may have become misshapen during shipping. Simply heat parts in warm water, or with a hair dryer, and reshape. Then, run cold water over reshaped parts.
- Carefully examine diagram and all parts before assembly.
- Trim excess as shown in diagram.*
- Check parts for fit before gluing.
- Assemble as indicated in diagram.
- In order to ensure the figure's balance, fill legs to give lower body weight (some modelers use plaster, sand or other weighted material).
- Your kit is now ready for painting. Paint according to Suggested Paint Scheme.
- DaH bIDoH'ej bIH0 ta'llj!

* With soft vinyl kits, warming the pieces with a hair dryer or warm water allows the modeler to trim the pieces more easily.
